OUR COMPANY

The range of DOORS & WINDOWS

CRAFTED ESPECIALLY for YOU!

"Our doors and windows are MAKE-TO-ORDER, ensuring that each product is customized precisely to our customer's desires. Whether it's a specific size, color, or feature, they have the freedom to personalize the product to their individual style and preferences.

In addition to this customization, Windure doors are crafted with meticulous attention to detail. They feature seals around the edges, providing exceptional weatherproofing when closed, effectively keeping out insects, moisture, and noise. Furthermore, our units are equipped with multi-point locking systems, securing the door/window along its frame. This added security measure makes it significantly more difficult for intruders to force the door open, offering our customers peace of mind and enhanced protection for their homes."

Why Choose Windure?

We source and use only the highest quality UPVC materials, ensuring longevity, weather resistance, and low maintenance for our doors and windows.

WINDURE®

Alu +

Coming Soon

THE SLIMMEST, THE SMOOTHEST, THE FINEST

INTRODUCING WINDURE ALU+, a SYSTEM ALUMINIUM product, creating new benchmark in Doors and Windows segment. WINDURE'S aluminum doors and windows come in various styles and designs to suit different architectural preferences. These windows may include features such as sliding windows, casement windows, and others, catering to both residential and commercial applications. Known for their innovative designs and sustainability, Windure's Aluminum doors/windows are also popular due to their durability, strength, and resistance to corrosion.

CASEMENT DOOR

Exclusively designed upvc doors are the perfect way to add charm and character to your surroundings. These Casement doors are equipped with hook locks and 3D hinges which ensure smooth operation with safety. uPVC casement doors are an ideal choice for homes looking for wide openings.

Available in:

CASEMENT WINDOW

A casement window that has a hinge on one side, allowing it to open in an outwardly direction for ventilation. It has dual gasket sealing to provide excellent dust resistance, noise insulation. The window comes with multiple point locking systems and friction stay that ensure the window remains open in a fixed position.

Available in:

CASEMENT *Series*

TOP HUNG

These windows are hinged at the top, allowing the bottom to swing outward or inward when opened. This design maximizes ventilation while preventing rainwater from entering the inside.

UPVC top-hung windows from Windure offer a blend of style, functionality, and durability, making them an excellent choice for any home.

Available in:

FIX WINDOW

As the name suggests, these unit consist of a single fixed panel wherein the glass cannot be opened or closed. Fixed windows are most ideal for spaces that require low maintenance and high energy efficiency. This windows typically feature double or triple glazing to improve energy efficiency and provide sound insulation.

Available in:

FRENCH WINDOW

French windows open outward together without a mullion separating them. This maximizes the view that can be gained when both sash are opened together. French UPVC windows add a touch of timeless elegance to any home with their classic design.

Available in:

3 TRACK SLIDING

These windows feature three parallel tracks with an outer frame, allowing for three sliding panels to operate independently. The tracks are typically designed to facilitate smooth and effortless movement of the window sash. SS Mosquito Mesh or Fiber Mesh can be installed on the inside or outside sliding sash.

Available in:

2 TRACK SLIDING

2-track sliding windows, distinguished by their two glass panels that slide horizontally along separate tracks, offer a space-efficient, easy-to-operate solution for both residential and commercial spaces. Their smooth gliding mechanism provides effortless ventilation and a modern aesthetic, while their versatility in materials and customization options make them suitable for various architectural styles.

Available in:

SLIDES & FOLD

Slide & fold UPVC doors, also known as bi-fold doors, are a versatile and stylish option for connecting indoor and outdoor spaces seamlessly. These doors feature multiple panels connected by hinges, allowing them to fold and slide along a track system. The number of panels can vary depending on the width of the opening.

Available in:

TILT & TURN

Tilt and turn windows can be opened in two ways: they can either swing open inwards like a door or tilt inwards at the top. This dual functionality allows for different ventilation options and ease of cleaning. Advanced engineering facilitates both these operations with the simple turn of a single handle.

Available in:

VILLA WINDOW

This windows is a unique combination of style, elegance, and security. They are the only windows that come equipped with a twin sash, bug mesh, and grill integrated into their design. These windows typically feature expansive glass panels that offer breathtaking views and ample natural light, creating a seamless connection between indoor & outdoor spaces.

Available in:

DOOR & WINDOW WITH SS GRILL

A traditional window having a provision for inbuilt SS grill to provide security layer against burglary. These fixtures provide the timeless charm of traditional designs while incorporating modern materials for enhanced durability and safety. With sleek stainless steel grills integrated seamlessly into the window or door frame, they offer a stylish aesthetic that complements various architectural styles.

Available in:

WINDURE[®]

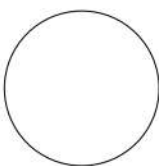

PALLETTE OF PERFECTION

Our range of uPVC window are available in multiple colours the aesthetic of the space, bringing a rusting and natural outlook.

You can combine these high-quality surface structures with your unique taste and style for windows & doors that are also meant to blend in with the interiors. All the surface are incredibly weather resistant, extremely impact resistant, and simple to clean.
